

ALBA 250 is a universal wrapping machine both with intermittent movement and with continuous movement. Suitable to create completely closed bags around different kinds of products. You can use ALBA 250 to wrap, even at the same time, products of different shapes and dimension. ALBA 250 has got a compact structure completely in stainless steel. The best materials, our experience and technical knowledge, have allowed us to obtain a very efficient and modern machine. ALBA 250 can work continuously and autonomously without particular cautions.

ALBA 250 can be completed with various optional: for example automatic infeed, shrink tunnel, printers for date, price, code, device to work in MAP etc.

Technical Data

Max. speed: 13 Mt / Min. (20 MT / Min. continuous movement)

Noise level: <75db

Machine dimensions (mm): 2380 x 1350 x 1290 (height)

Electrical consumption Installed power: 4Kw

Standard voltage: 400V 50 Hz

Bags dimensions Max. width: 250 mm

Max. height: 150 mm

Length: from 40 mm to endless

Film Reel Max. width: 600mm

Core diameter: 70/80mm

Packaging material: polypropylene, coupled material with paper, aluminium, etc.

Accessories

Automatic infeed, Hot print unit, Device for ATM, Device for alcohol, Foto-cell for Printed films, Wheels, Etc.
