

**ALBA 350-S** is a universal wrapping machine with a continuous movement suitable to create completely closed bags around different kinds of products. You can use **ALBA 350-S** to wrap, even at the same time, products of different shapes and dimensions. **ALBA 350-S** can reach a very high speed: up to 20 metres/min. Every movement is controlled by brushless main motors to guarantee a long-term reliability and always perfect seals. The best materials, our experience and technical knowledge, have allowed us to obtain a very efficient and modern machine. **ALBA 350-S** can work continuously and autonomously without particular cautions. **ALBA 350-S** can be completed with various optional: for example automatic infeed, shrink tunnel, printers for date, price, code, device to work in MAP etc.

# ALBA 350-S

CONFEZIONATRICE ORIZZONTALE  
HORIZONTAL MACHINE

## Technical Data

Max. speed: 20 Mt / Min.

Noise level: <75db

Machine dimensions (mm): 3800 x 1215 x 1500 (height)

Electrical consumption Installed power: 4Kw

Standard voltage: 400V 50 Hz

Bags dimensions Max. width: 350 mm

Max. height: 250 mm

Length: from 80 mm to endless

Film Reel Max. width: 800 mm

Core diameter: 70/80mm

Packaging material: polypropylene, coupled material with paper, aluminium, etc.

## Accessories

Automatic infeed, Hot print unit, Device for ATM, Device for alcohol, Foto-cell for Printed films, Wheels, Etc.
