

## Germ-proof Plant

vertical bag sealing, forming, filling,  
and closing machine

Type FB V 80-100 combined with inserting machine Type MK (Höller)

**FB V 80-100** : production of germ-proof packs from 2 rolls of film

Bag size: from 35 x 35 up to 80 x 100 mm

**MK 3**: generally overhauled and modified Höller machine for inserting the germ-proof packs into paper bags

Bag size: from 25 x 70 up to 105 x 170

### Special Characteristics:

Proven packaging line, high output (up to 90 bags/min.), attachment of various dosing possibilities, smooth operation, minimum changeover time, mostly free of maintenance, user friendly construction, low priced spare parts by using standardised parts.
