

C.M.A.'s **ITALY-L** model of horizontal, form, fill and seal (HFFS) packaging machine with rotary jaws is designed to meet the most various requirements, both in the food and non-food industries. **ITALY-L** is modern, reliable and very flexible even because is completely electronic, in fact **ITALY-L** includes:

- a MULTI – SHAFT ELECTRONIC CONTROL (to obtain versatility and flexibility both in product changes and on every movements).
- 3 BRUSHLESS ENGINES (rotary jaws, rollers, feeding unit) to guarantee a very precise functioning and ermetic seals.
- a COLOUR TOUCH SCREEN DISPLAY (screen-integrated temperature control, machine parameter adjustment, diagnosis and information of the machine state, etc.).
- a PARAMETER MEMORY STORAGE: more than 50 products.

ITALY-L can be connected to a wide range of automatic and semi-automatic feeders and it can be also installed in automatic packing lines.

## ITALY-L

CONFEZIONATRICE ORIZZONTALE  
HORIZONTAL PACKAGING MACHINE

### TECHNICAL DATA ITALY - L

Max. speed: 45 Mt / Min.

Machine dimensions (mm): 4400 x 1100 x 1650 (height) Approximative weight: 1000 Kg

**Electrical consumption** Installed power: 8Kw

Standard voltage: 400V + N + T 50 Hz

#### Product dimensions

Width: 10 - 220 mm (other dimensions on request)

Height: 5 - 145 mm (other dimensions on request)

Length: 60 - 350 mm (other dimensions on request)

Max. and Min. dimensions cannot be combined in the same machine.

**Film Reel:** Max. width: 700 mm

Core diameter: 76 mm

Packaging material: polypropylene, coupled material with paper, aluminium, etc.

#### ACCESSORIES:

Automatic infeed, Hot print unit, Device for MAP, Foto-cell for Printed films, Etc.talled in automatic packing lines.
