

The Maxiform Baby X is a compact machine designed to produce in a small to medium scale. Produces a variety of products from 10 to 180g in 5 different shapes. You are able to adjust the size and the circumference of the product as well as if it's filled or not and the quantity of filling.

All equipment is built in Stainless Steel AISI 304.

Complete: Includes treadmill (belt), 4 molds, 9 dough nozzles and 3 filling nozzles.

Precision: Electronic system, with potentiometer that controls the velocity speed of the dough, filling, shutters, molds, stopping time and treadmill (belt).

Easy to clean: Only 10 minutes to assemble and disassemble. All parts that have direct contact with the product being produced are made of stainless steel or plastic for food use (approved by FDA).

Weight x length x height: 950 x 750 x 1150mm

Machine Height: 110Kg

Electricity: *200/240v - 50/60Hz - 0,68Kw

Production per hour 30g: ** 3.600 pçs

Production per hour 180g: 900 pçs
