

## Small Flat-bag Forming-, Filling and Closing Machine Type FM-U simplex

The packaging machine, type FM-U Simplex completes the product range of SN as an economical small flag-bag forming, filling and closing machine. A reliable and simple operation, a compact size and flexibility are the assets of this type of machine. It produces bags from the roll, fills and closes them.

### Description of FM-U Simplex

type of bag: flat bags, from the roll  
range of size: from 25 x 50 mm up to 130 x 160 mm  
Packaging material: all commercial heat-sealing foils  
Output: around 80 cycles/min.

### Machine design

- machine housing built in modular design with all side machined aluminium plates
- all working stations are mounted on one basic platform
- a replacement foil roll allows a quick change of the foil
- continuous adjustable gear
- all important operations are carried out by cams and levers
- all electrical devices are positioned in the machine housing and are easily accessible
- elements of the control panel are positioned on the front side of the machine
