

Shrink tunnel with two separate chambers of retraction.

TR 350 has high performance because it can reach until to 20 Mt/Min. speed, it can wrap little and big products and finally, there are lots of setting possibilities. **TR 350** is available both in painted structure and in stainless steel version.

TECHNICAL DATA

Machine dimensions Length: 2070 mm

weight: 1200 mm

height: 1300 mm

Chamber height: 265 mm

Speed: Up to 20 Mt / min.

Working temperature: 250 °C Max.

Number of modules: 2

Infeed width: 350 mm

Electrical consumption Voltage: 400V 3 phase + Neutral

Max. consumption: 16 Kw at 400 V

Approximate weight: 450 kg

Machine structure: Stainless steel, painted structure
